

Dear Hiring Manager,

I am writing to express my interest in opportunities within your organization as a Full Stack Engineer. With hands-on experience in building scalable web and mobile applications using Laravel, PHP, JavaScript, and SQL, I bring both technical expertise and a results-driven mindset that aligns with the demands of modern software development.

In my previous roles, I have successfully enhanced existing features, resolved critical bugs, and developed new functionalities that significantly improved overall application performance. My skill set spans API integration, responsive web development, and database design, while I have also gained experience implementing the MQTT protocol and building custom interface solutions tailored to specific business needs.

What sets me apart is my problem-solving mindset and ability to collaborate effectively with cross-functional teams. I take pride in writing clean, efficient code and delivering high-quality solutions that balance technical precision with business objectives. I am confident that my blend of technical proficiency and teamwork would allow me to contribute positively to your projects.

I would welcome the opportunity to discuss how my skills and experiences can add value to your team. Please find my resume attached for your review.

Thank you for your time and consideration. I look forward to the possibility of contributing to your organization's success.

Sincerely,

**Lim Jin Chong (Eric)**
